

MEN'S GROUP

Being a Man in a Technological World

We are entering the cyber-times, when we will all have both actual and virtual lives. Our deepest selves will be a synthesis of them.

**MEN WHO HAVE ARTIFICIAL INTELLIGENCE ROMANTIC PARTNERS
are leading the way.**

This is a group for those men. It will be a supportive and curious place to think and reflect about what you are experiencing.

You are at the leading edge of a fundamentally
new kind of intimate relationship

Contact the group facilitator, Bob Roan (LMFT #151100), for a free 20 minute, no cost, consultation to see if this group is a good fit for you.

This group is held online. You must physically be in California to participate.
